

**Florida Cancer Control
& Research Advisory Council**

Florida Cancer Control & Research Advisory Council Membership
(October 2022)

Chair
Clement Gwede, PhD, MPH, RN, FAAN
H. Lee Moffitt Cancer Center & Research Institute

Vice Chair
Erin Kobetz, PhD, MPH
Sylvester Comprehensive Cancer Center
University of Miami

Senator Aaron Bean
Senate President's Appointee

Asher Chanan-Khan, MD
Florida Hospital Association

Representative Linda Chaney
House Speaker's Appointee

Immediate Past Chair
Christopher Cogle, MD
Senate President's Appointee

Michael Diaz, MD
Association of Community Cancer Centers

Patricia I. Geddie, PhD,
APRN-CNS, AOCNS
Florida Nurses Association

Joseph Ladapo, MD, PhD
Florida's Surgeon General

Merritt Martin
House Speaker's Appointee

Nitesh Paryani, MD
Florida Medical Association

Mitchell F. Peabody, DO
Florida Osteopathic Medical Association

Ramzi G. Salloum, PhD
University of Florida Health Cancer Center

Amy Smith, MD
Governor's Appointee

Megan Wessel, MPH
American Cancer Society

THANK YOU
TO OUR PARTNERS

Mission

Advise the Legislature,
Governor, and Surgeon
General on ways to reduce
Florida's cancer burden

Approval of Minutes from May 20, 2022 Meeting

Highlights of Florida's Cancer Burden

Cancer Incidence

Cancer Case Count by Population

Cancer Mortality

Cancer Mortality by Florida County

Age-adjusted cancer mortality rates per 100,000
For 2020

Lung Cancer Screening – Florida Cancer Plan

Goal 10: Reduce lung cancer mortality through early detection of lung cancers in Floridians.

- ❑ Within the population of Floridians newly diagnosed with lung cancer, increase the percentage of those with limited stage disease (Stage 1 and 2).
- ❑ Identify or develop a surveillance method that measures the percentage of Florida adults aged 50-80 years old who are at higher risk for lung cancer and who have undergone annual lung cancer screenings.

Lung Cancer Screening with Low Dose CT

The only recommended screening test for lung cancer is low-dose computed tomography (also called a low-dose CT scan). Screening is recommended only for adults who have no symptoms but are at high risk.

Eligibility

- Adults aged 50 to 80 years who have a 20 pack-year smoking history and currently smoke or have quit within the past 15 years
- Screening should be discontinued once a person has not smoked for 15 years or develops a health problem that substantially limits life expectancy or the ability or willingness to have curative lung surgery.

Among those eligible for LDCT screening:

- 5% - 6% are screened nationally
- 3% are screened in Florida

Estimated proportion of adults aged 55-80 years eligible for lung cancer screening with low-dose computed tomography (Low Dose CT)...

J Natl Cancer Inst, Volume 113, Issue 8, August 2021, Pages 1044–1052, <https://doi.org/10.1093/jnci/djaa170>

Long-Term Vision of Cancer in Florida

- No disparities in cancer incidence and mortality
- Deep scientific understanding of cancer biology
- Strong workforce of cancer clinicians, researchers, policy workers
- Elected officials, public servants, and community leaders making smart health policies

Discussion

- 1) Spotlight on colorectal cancer screening – Dr. Chris Cogle will share an innovative partnership initiative.
- 2) Spotlight on lung cancer screening (low dose CT screening) – a priority need. Cancer Data Workgroup contributes to better capture of FL cancer screening efforts: an innovative pilot, as we will hear later.

Agenda Items

State Cancer Data Workgroup Update

Break (Lunch provided for those in-person)

State Health Improvement Plan & CRC Screening Campaign Updates

Department of Health Updates

Regional Cancer Control Collaborative Spotlight

Biomedical Research Advisory Council (BRAC) Update

State Legislative Update

Florida Palliative Care Coalition Update

State Cancer Plan Implementation – Pilot Funding Announcement

CCRAB Elections

Comments

Next CCRAB Meeting
