# Needs Assessment

---

10-year cancer cases by county  
– tables and trend graphs

Cancer cases by White, Black  
and Hispanic populations

Member education regarding  
new issues or solutions:

- ✓ Genetics and cancer
- ✓ COVID impact on cancer care
- ✓ Paying for cancer care
- ✓ Low-dose CT lung scanning
- ✓ Cardio-oncology

Florida Cancer Plan goals 4, 10,  
and 12

# Solutions

---

Targeting cervical, lung, and colorectal cancers in line with state cancer plan

Obtained and published cancer survivor feedback and recommendations based on the patient's treatment experience

Created a collective impact checklist to strength population or geographic based cancer collaboration

Began exploration of what role if any community or home paramedics might play in supporting cancer patients with their self-care between clinical visits
