

**Florida Cancer Control
& Research Advisory Council**

Florida Cancer Control & Research Advisory Council Membership

(January 2023)

Chair
Clement Gwede, PhD, MPH, RN, FAAN
Moffitt Cancer Center

Vice Chair
Erin Kobetz, PhD, MPH
Sylvester Comprehensive Cancer Center
University of Miami

Senator Colleen Burton
Senate President's
Appointee

Representative
Linda Chaney
House Speaker's
Appointee

Immediate Past Chair
Christopher Cogle, MD
Senate President's
Appointee

Michael Diaz, MD
Association of Community
Cancer Centers

Joseph Ladapo, MD, PhD
Florida's
Surgeon General

Jessica MacIntyre
DNP, MBA, APRN, AOCNP
Florida Nurses Association

Merritt Martin
House Speaker's
Appointee

Nitesh Paryani, MD
Florida Medical
Association

Mitchell F. Peabody, MD
Florida Osteopathic
Medical Association

Luis Raez, MD
Florida Hospital
Association

Ramzi G. Salloum, PhD
University of Florida
Health Cancer Center

Megan Wessel, MPH
American Cancer Society

VACANT
Governor's Appointee

THANK YOU TO OUR PARTNERS

Mission

Advise the Legislature,
Governor, and Surgeon
General on ways to reduce
Florida's cancer burden

Agenda Items

Log-in & Networking

Welcome, Introductions & Mission Moment

Approval of Minutes from May 12, 2023 Meeting

Biomedical Research Advisory Council (BRAC) Update

Casey DeSantis Cancer Research Program 3-Year Report

Florida Cancer Plan Updates & Discussion

1. Annual Revisions
 2. Planning Next Plan
-

Department of Health Updates

State Cancer Plan Implementation – Community Implementation Grants Update

Break (Lunch provided for those in-person)

Florida's Cancer Burden

1. Highlights
 2. Lung Cancer Screening Updates & Discussion
-

Florida Cancer Data System (FCDS) Update

1. State Cancer Data Workgroups
 2. Other
-

State Legislative Update & Discussion

Florida SHIP: Cancer Control Goal, Statewide Colorectal Cancer Screening & Prevention Initiative 2022-2023, & Medicaid and Cancer

Prostate Cancer Advisory Council (PCAC) Update

Cancer Incidence Rates in Florida versus the US

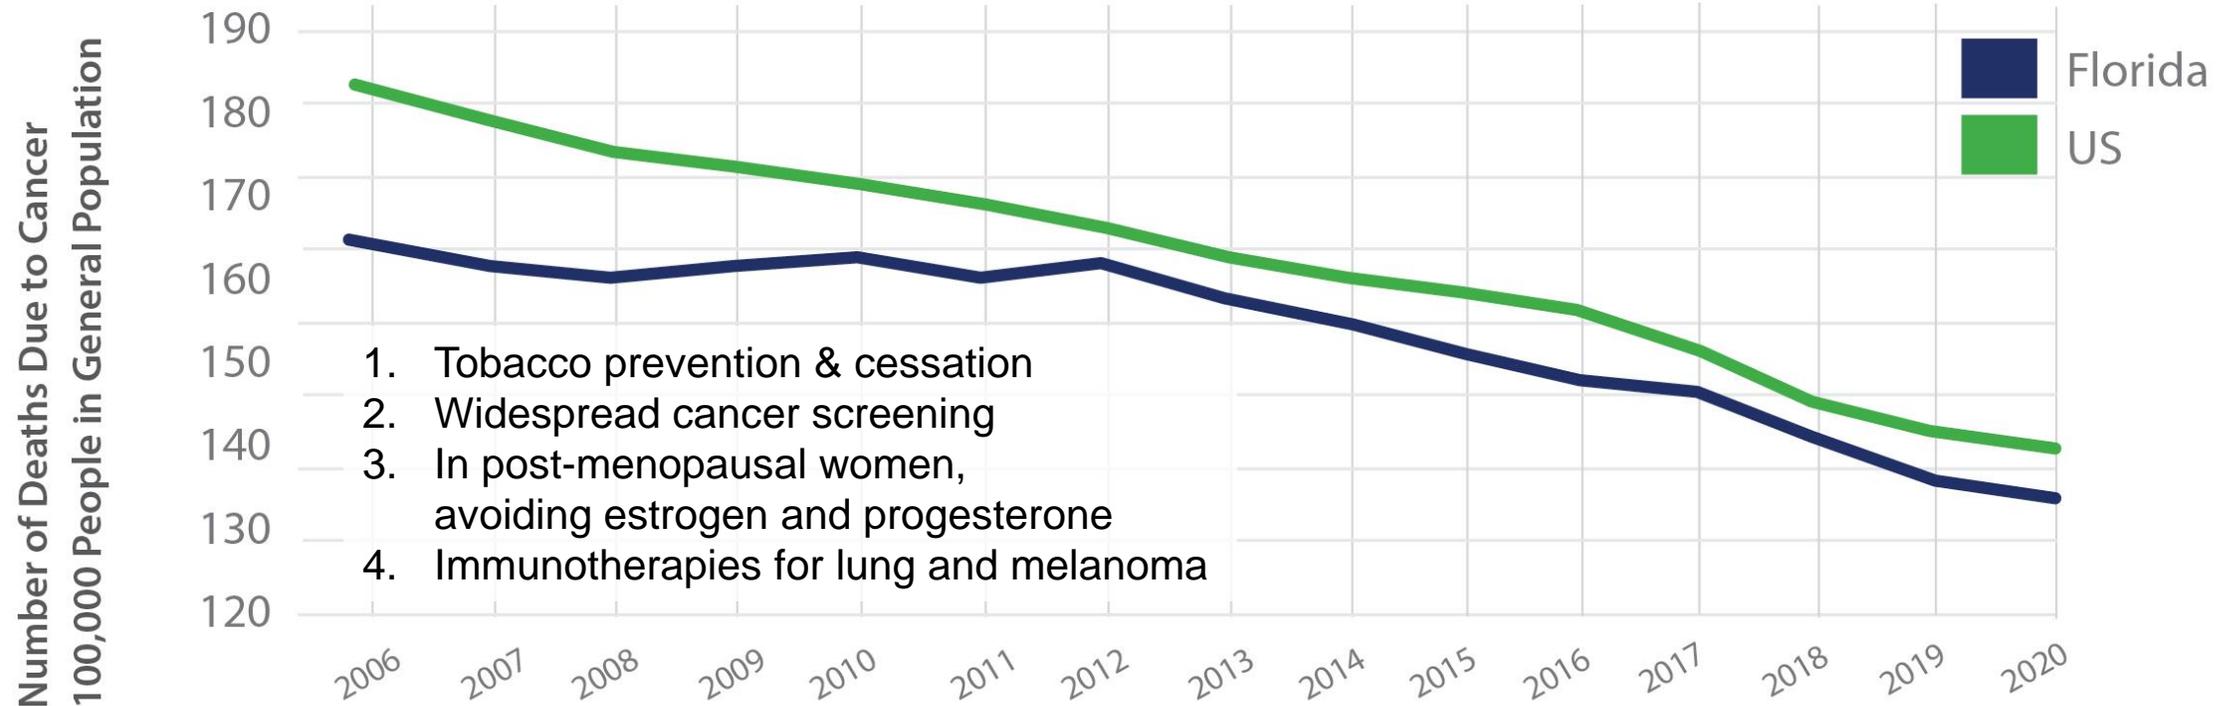

Data Sources: FCDS and SEER

**Incidence Rates for 2020 reflect fewer cancers diagnosed due to delays in screening and seeking care for a cancer diagnosis. This is directly attributable to the pandemic. The trends fall below the 2020 forecast. The counts are expected to increase in future years.*

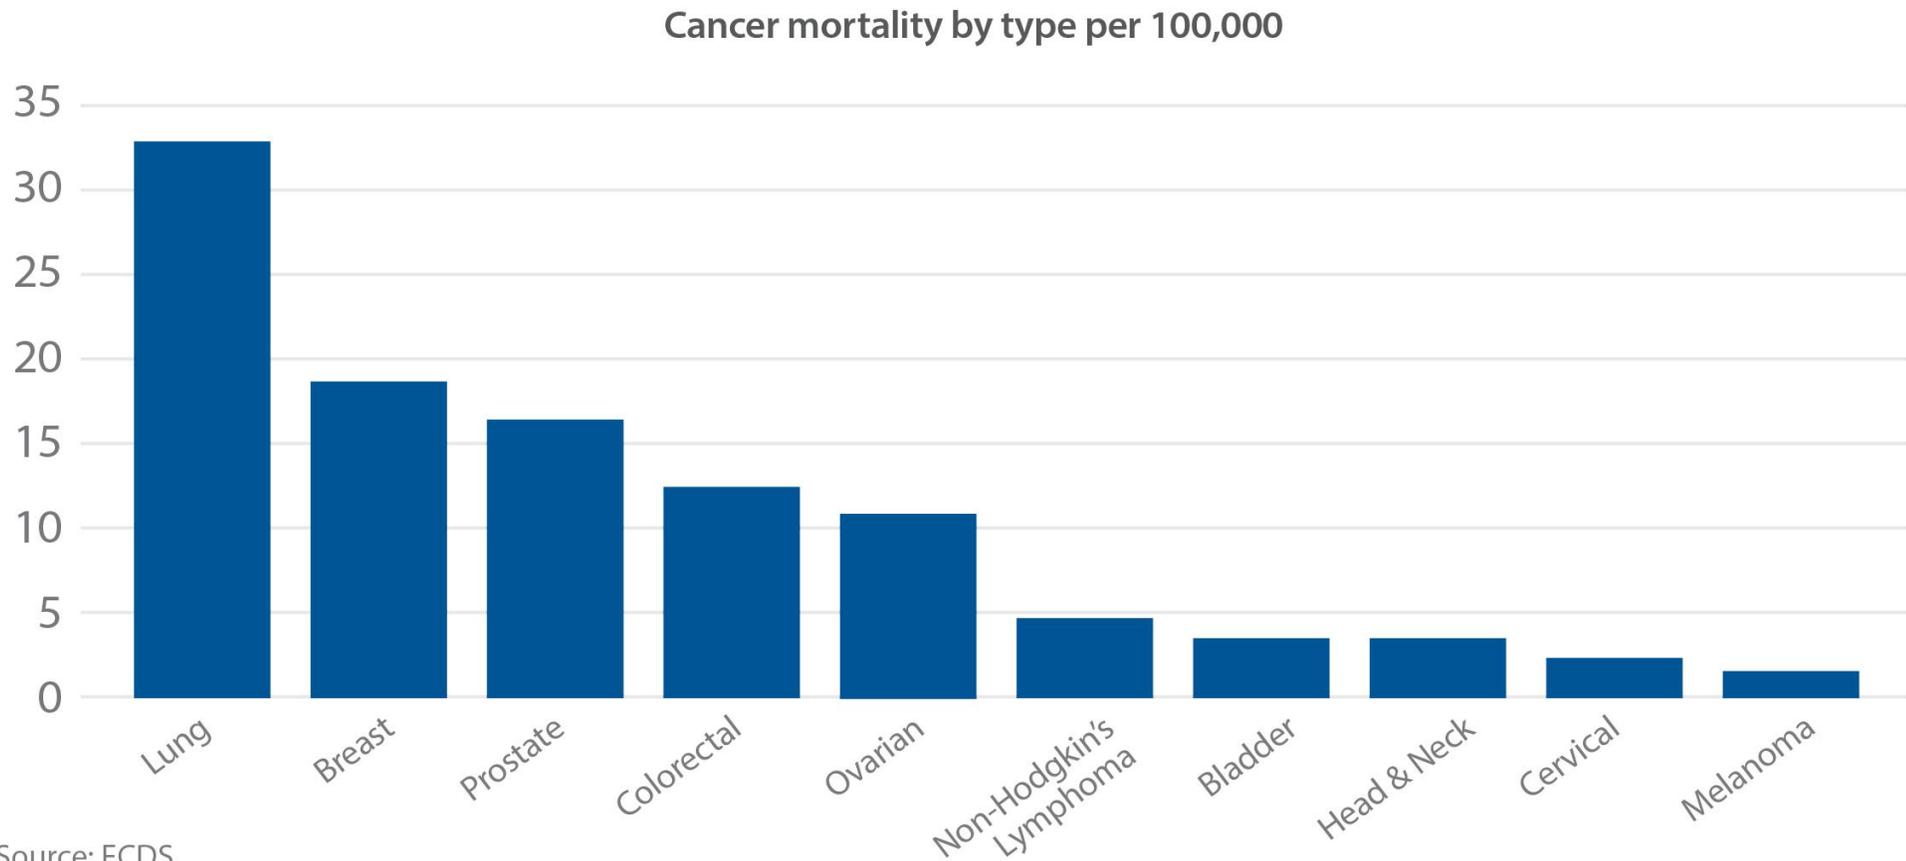

Cancer Mortality Rates in Florida versus the US

Cancer Mortality by Type in Florida, 2020

Source: FCDS

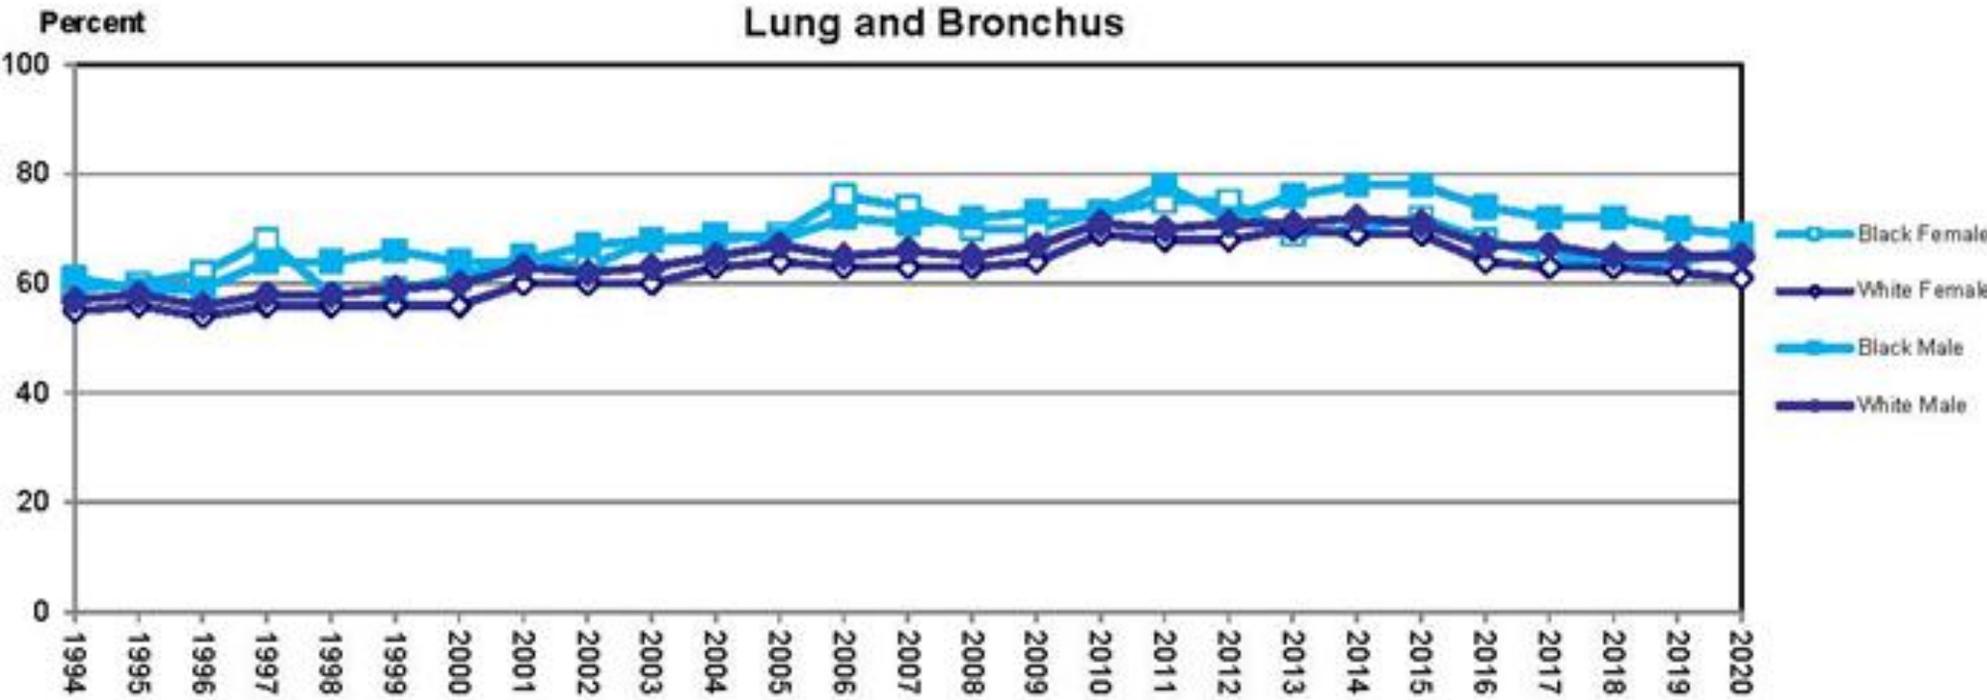

Lung Cancer Screening – Florida Cancer Plan

Goal 10: Reduce lung cancer mortality through early detection of lung cancers in Floridians.

- ❑ Within the population of Floridians newly diagnosed with lung cancer, increase the percentage of those with limited stage disease (Stage 1 and 2).
- ❑ Identify or develop a surveillance method that measures the percentage of Florida adults aged 50-80 years old who are at higher risk for lung cancer and who have undergone annual lung cancer screenings.

Percentage of Advanced Stage Lung Cancer at Diagnosis by Sex & Race, 1993-2020

Source: FCDS

Lung Cancer Screening with Low Dose CT

The only recommended screening test for lung cancer is low-dose computed tomography (also called a low-dose CT scan). Screening is recommended only for adults who have no symptoms but are at high risk.

Eligibility

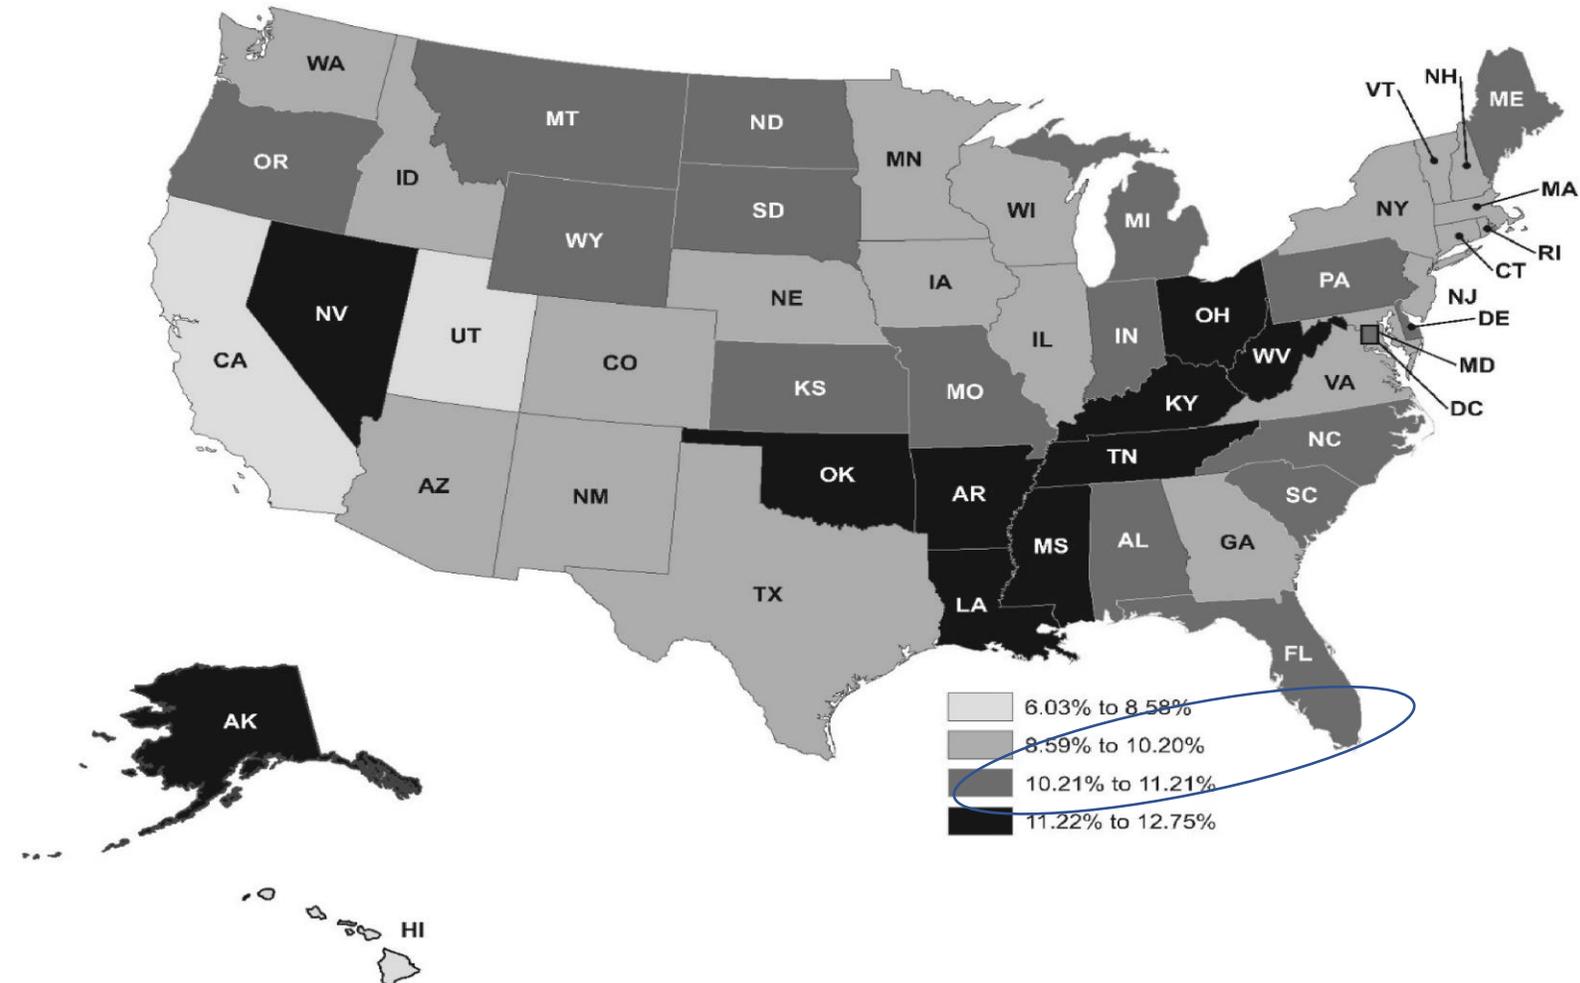

- Adults aged 50 to 80 years who have a 20 pack-year smoking history and currently smoke or have quit within the past 15 years
- Screening should be discontinued once a person has not smoked for 15 years or develops a health problem that substantially limits life expectancy or the ability or willingness to have curative lung surgery.

Among those eligible for LDCT screening:

- 5% - 6% are screened nationally
- 3% are screened in Florida

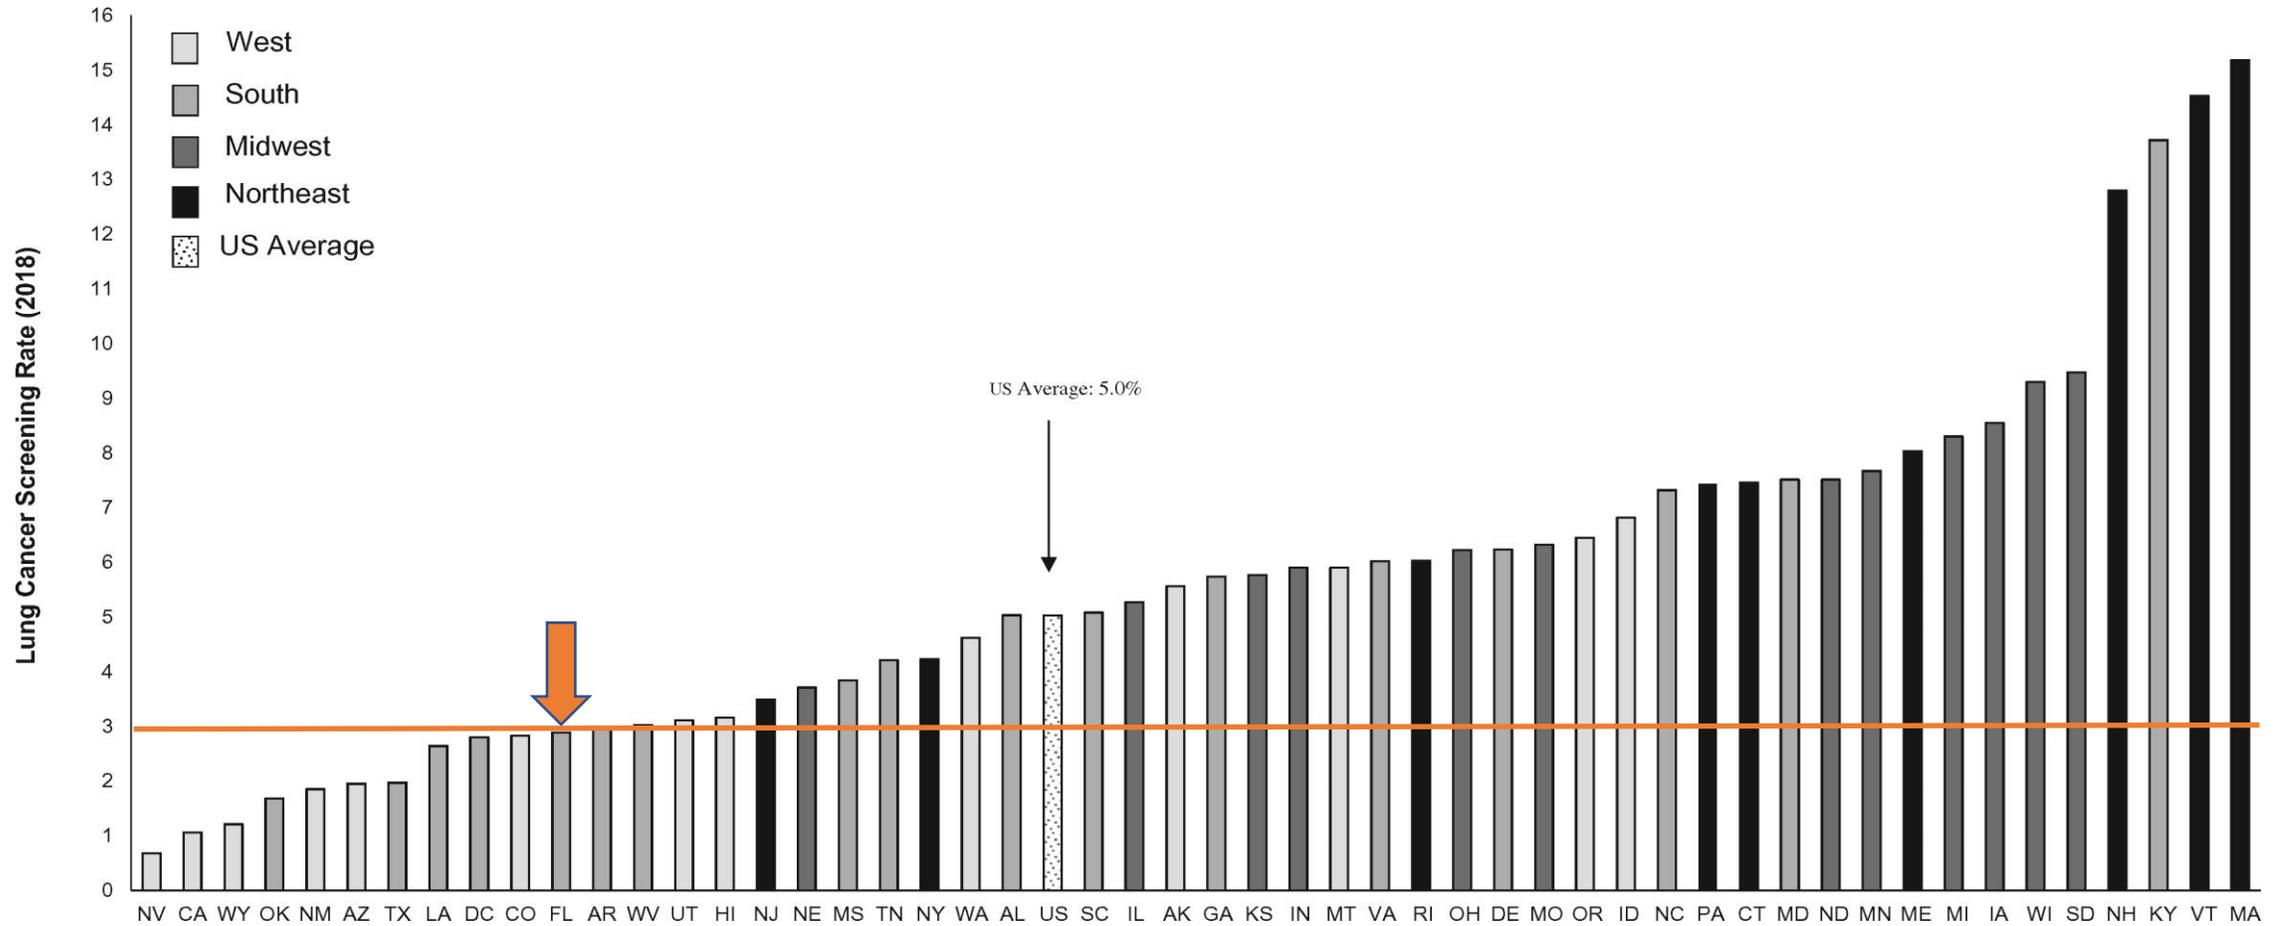

Estimated proportion of adults aged 55-80 years eligible for lung cancer screening with low-dose computed tomography (Low Dose CT)...

J Natl Cancer Inst, Volume 113, Issue 8, August 2021, Pages 1044–1052, <https://doi.org/10.1093/jnci/djaa170>

The content of this slide may be subject to copyright: please see the slide notes for details.

Proportion eligible adults aged 55-80 years screened for lung cancer in the past year with low-dose CT.

Long-Term Vision of Cancer in Florida

- No disparities in cancer incidence and mortality
- Deep scientific understanding of cancer biology
- Strong workforce of cancer clinicians, researchers, policy workers
- Elected officials, public servants, and community leaders making smart health policies

Discussion

- 1) Spotlight on lung cancer screening (low dose CT screening) – a priority need.
 - a. Dr. Lary Robinson will present.
 - b. Cancer Data Workgroup contributes to better capture of FL cancer screening efforts: an innovative pilot, as we will hear later.

- 2) Spotlight on colorectal cancer screening – Dr. Chris Cogle will update on an innovative partnership initiative.
