

**Updating the Florida Cancer Plan  
Screening/Early Detection Subgroup Meeting  
June 16, 2025 at 3:00 PM**

**Agenda**

1. Welcome and Introductions – 5 minutes
2. Overview of the FL Cancer Plan update process – 10 minutes
  - a. Subgroup roles and responsibilities
  - b. Data and information provided to each subgroup
  - c. Specific tasks and timelines (review workbook)
  - d. Q&A about the process
3. Complete Step 1 of the Workbook: Review Florida and Other State Cancer Plans – 40 minutes **(Please review plans in advance of the meeting and come ready to discuss your answers to the questions in Step 1)**
4. Next Steps/Action Items – 5 minutes

**Goals and Objectives in Current Florida Cancer Plan**

**SCREENING AND EARLY DETECTION**

**Goal 10: Reduce lung cancer mortality through early detection of lung cancer in Floridians.**

**Objective 10.1:** By 2025, within the population of Floridians newly diagnosed with lung cancer, increase the percentage of those with limited stage disease (Stage 1 and 2) from 34.5% (Baseline, 2016 FCDS) to 40% or higher.

**Objective 10.2:** By 2025, identify or develop a surveillance method that measures the percentage Florida adults aged 55 to 80 years old who are at higher risk for lung cancer and who have undergone annual lung cancer screenings.

**Goal 11: Reduce breast cancer mortality through early detection of breast cancer in Floridians.**

**Objective 11.1:** By 2025, among Floridians newly diagnosed with breast cancer, increase the percentage of those with limited stage disease (Stage 1 and 2) from 67.4% (Baseline, 2016 FCDS) to 75% or higher.

**Objective 11.2:** By 2025, increase the percentage of Florida women aged 50 to 74 years old in every Florida community who undergo mammogram screening (in past 2 years) from 81.4% (Baseline, 2018 BRFSS) to 90% or higher.

**Goal 12: Reduce colorectal cancer mortality through early detection of colorectal cancer in Floridians.**

**Objective 12.1:** By 2025, among Floridians newly diagnosed with colorectal cancer, increase the percentage of those with limited stage disease (Stage 1 and 2) from 42.5% (Baseline, 2016 FCDS) to 50% or higher.

**Objective 12.2:** By 2025, increase the percentage of Floridians aged 50 to 75 years old who have fully met the US Preventive Services Task Force (USPSTF) recommendation for colorectal cancer screening from 70.4% (Baseline, 2018 BRFSS) to 80% or higher.

**Objective 12.3:** By 2025, draft legislation that builds upon the Florida Colorectal Cancer Control Program that supports both systems change to increase clinic screening rates and colorectal screening costs of uninsured and underinsured Floridians similar to the Mary Brogan Florida Breast and Cervical Cancer Early Detection Program.

**Goal 13: Reduce prostate cancer mortality in Florida men through early detection of advanced disease.**

**Objective 13.1:** By 2025, increase the percentage of Florida men aged 40 to 85 years old who have ever discussed the advantages and disadvantages of the PSA blood test with a healthcare provider from 17.2% (Baseline, 2018 BRFSS, PCPSAD11 and PCPSAAD3) to 25% or higher.

**Objective 13.2:** By 2025, identify or develop a surveillance method that measures the percentage of Florida men who are at above-average risk for prostate cancer and who have undergone prostate cancer screenings.

**Goal 14: Eliminate hepatitis C virus (HCV) as a public health problem in Florida by increasing screening and linkage to care.**

**Objective 14.1:** By 2025, identify or develop a surveillance method that measures the percentage of Floridians born between 1945 and 1965 who were offered and received HCV testing.

**Objective 14.2:** By 2025, enact law to increase HCV screening in all Florida communities to ensure timely HCV diagnosis and linkage to care.
